GET FUNKY NOW

San Francisco designer **Funk Divine** offers a bold answer to the pale organic T-shirt with its collection of gold-on-black cutoff tees and zip-up sweatshirts (\$38-\$128). Made of hemp and organic cotton, the tops exude attitude. They come emblazoned with Egyptian scarabs that give the illusion of giant necklaces, with gold strands threading down the shirts' backs. And unlike typical tees, these shirts hug the hips and fall a little off the shoulders, adding edge to the look. The designer takes activism seriously, too, spreading a vocal message about the need for hemp production in the U.S.
